EDUCATION

IIT JODHPUR

B.TECH IN COMPUTER SCIENCE
AND ENGINEERING
Jodhpur, India
SGPA : 7.3

SENIOR SECONDARY SCHOOL

RMG MAHESHWARI ENGLISH
ACADEMY
2022 | Surat, India
Percentage: 91.20

SECONDARY SCHOOL

HILLS HIGH SCHOOL
2020 | Surat, India
Percentage: 95.60

SKILLS

PROGRAMMING

C • C++ • Python
• Verilog • MySQL • JavaScript
• Neo4j

WEB DEVELOPMENT

HTML • CSS • ReactJS
NodeJS • REST API

OTHERS

Numpy/Pandas/Scikit-Learn
• Git/Github • Solidworks • MIPS

COURSEWORK

UNDERGRADUATE

Introduction to Computer Science
Software Engineering
Cloud Computing
Graphics Designing
Data Structures and Algorithms
Pattern Recognition and Machine Learning
Database Management Systems
Operating Systems
Computer Architecture
Artificial Intelligence
Principles of Programming Languages
Probability, Statistics and Stochastic Processes
Mathematics For Computing
Foundations of Quantum Information

WORK EXPERIENCE

MICROSOFT | SOFTWARE ENGINEERING INTERN | MAY - JULY 2025

Azure, Python, Grafana, ADX, REST APIs, Serverless Functions, Kusto (KQL)

- Led a standalone project to build an **end-to-end observability platform** for tracking download trends across **PyPI** and **npm** package managers.
- Designed and implemented serverless **timer triggered Azure Functions in Python** to ingest daily data from public **REST APIs** and Linehaul logs into **Azure Data Explorer (ADX)**.
- Created robust **data pipelines** with scheduled triggers, retries, and schema validation, ensuring accurate and timely ingestion across multiple sources.
- Built an interactive **Grafana dashboard** on top of ADX using **KQL**, enabling client-wise usage insights, top package tracking, and anomaly alerts.
- Took full ownership of project delivery — from system design and integration to deployment, monitoring, and stakeholder reviews with PMs.

AI TALENT FORCE INC. | AI ENGINEERING (SDE) INTERN | JAN 2026

Python, FastAPI, ChromaDB, Embeddings

- Built semantic search API for Japanese PPT slides using transformer embeddings (E5-large), achieving <50ms queries on 10K+ vectors.
- Developed full pipeline: PPT parsing → 1024-dim embeddings → HNSW-indexed ChromaDB storage.
- Deployed FastAPI service with modular code and tests, enabling 2-person collaboration.
- Delivered zero-cost solution outperforming commercial models and saving nearly \$540/year.

PROJECTS

GENERIC DATA ENCRYPTION MODULE | Java, Spring Boot, Redis,

Microservices, REST API, AOP, Postman

- Built a **generic encryption service** using **AES-256/RSA-2048**, ensuring secure and reliable data flow.
- Created a **reusable library** with custom annotations, cutting integration time by 50%.
- Developed a client service for **10+ APIs**, reducing manual encryption logic by 70%.

FACE DETECTION, RECOGNITION & CLUSTERING | Python,

OpenCV, TensorFlow, Keras, Scikit-learn | 🌐

- Engineered an end-to-end **Deep Learning-based Computer Vision pipeline** for automated face detection, recognition, and clustering.
- Utilized **CNN embeddings (VGGFace, MTCNN)** with PCA and Eigenfaces for dimensionality reduction and improved feature discrimination.
- Optimized training and inference for high-resolution imagery, achieving **95% accuracy** on the ATT facial dataset.

POR AND ACHIEVEMENTS

- **Led the team** selected among the top teams at the institute level in **SIH'24 & '25**
- Achieved (**AIR 3626**) in **JEE Advance 2022** and **99.54 percentile (AIR 4222)** in **JEE Mains 2022**.
- **Head of Publicity and Media** for **Prometeo'25** (Annual Technical Fest of IIT Jodhpur)
